Books

Only in Australia: the History, Politics and Economics of Australian Exceptionalism (2017)

1. '... the book makes a substantial contribution to contemporary debates about the appropriate direction for future policy reform' **Andrew Podger, *Economic Record***, June 2017

The Causes, Consequences and Compensations of Inflation: An Investigation of Three Problems in Monetary Theory (2007)

William Coleman, Curriculum Vitae

with an interest in those issues" -**Peter Ireland**, *Journal of Economic Literature*, March 2008, pp.159-161

2. "Originality is definitely the hallmark of this book, which looks at inflation in a fresh and unusual way.... While the book is not mathematically sophisticated, it is so conceptually. It is demanding but rewarding reading. I guess that its writing must have taken several years of hard work. Erudition and sharpness of mind are present throughout". **Michel de Vroey**, *Economica*, April 2010, pp.404-5

Giblin's Platoon: The Trials and Triumph of the Economist in Australian Public Life (2006)

1. "This reviewer read the volume twice ... and read it a second time with as much enjoyment as the first", **Susan Howson**, *History of Political Economy*, 40, 2008, pp 203-6.

2. "..., by any reckoning, a quite extraordinary book", Dr **Ken Henry**, Secretary to the Australian Treasury, 2 August 2006.

3. "A great story of the relationship between economists and policy making", **Roger Backhouse**, University of Birmingham

4. "The book is a welcome and valuable contribution to the literature", Sir **Bruce Williams**, *Australian Journal of Public Administration*, 66(1) March 2007 , pp. 128-129.

Economics and Its Enemies, The story of two centuries of anti-economics (2002, 2004), has been judged in these terms:

1. "I am reading it with great pleasure". **Robert Lucas**, Nobel Laureate in Economics, 1995.
2. "Coleman's wonderful book [is] a terrifically valuable piece of scholarship... vast reading and it shows", **David M. Levy**, George Mason University.
3. "Unique, intensive and extensive in its subject matter ...this volume has every quality to become a classic." -**C. J. Talele**, ***Choice: Current Review of Academic Books***.
4. "It should belong on the shelves of anyone interested in intellectual history, alongside the works of Isaiah Berlin" -**P.P.McGuinness**, ***Quadrant*** , July-August 2003

William Coleman, Curriculum Vitae

5. “...a crushingly learned volume of the history of economic thought. This should definitely earn him professional praise”, **Eric Jones**, University of Melbourne, *Policy*, 19(3), Spring 2003
6. ‘For anyone who wants to illuminate the historical background of the economic critique, this book is a rich mine’. **Benedikt Koehler**, *Frankfurter Allgemeine Zeitung*, 9 August 2004
7. ‘Coleman’s *Economics and Its Enemies* makes a powerful statement of core economic reasoning without quite silencing Southey when he said “in came calculation and out went feeling”’, **Gary Hawke**, *Australian Economic History Review*, 47(3) 2007.

Rationalism and Anti-Rationalism in the Origins of Economics, (1995) has been judged by reviewers in these terms:

1. “He makes excellent use of brief and telling quotations, and almost every page has something to say which will be new to most readers” (**Walter Eltis**, *European Journal of the History of Economic Thought*:1999, 337-340).

2. “Coleman provides a deep, closely reasoned and wide-ranging deconstruction of [Adam] Smith’s writings with regard to the central topic of this book. He has dealt insightfully with certain conflictual foundations of both 18th century and present day economics... Indeed, Coleman has a quite perceptive and discerning intellect. He brilliantly, if controversially, deconstructs and interprets the history of economic thought in terms of rationalism versus anti-rationalism” (**Warren J. Samuels**, *Journal of Interdisciplinary Economics*, volume 7, pp. 291-313)

3.“In this attractive and generally well-written book Coleman traces the clash between rationalism and anti-rationalism in 18th century thought. Coleman concludes this enjoyable book by clearly hinting that confidence in the capacity of economics to discover truth is very easily over-estimated” (**Ian Steedman**, *The Manchester School*, pp.238-439, 1997)

4. *History of Economic Thought Newsletter*: “I can strongly recommend this short book to anyone with a serious interest in eighteenth century economics” (**Anthony Brewer**, 14-15, 1999)

5.: “This is a scholarly and intelligent book and will be authoritative in its field” (**Athol Fitzgibbons**, *History of Economics Review* Winter - Summer 1997).

Money and Finance in Australia (1994, with Bruce Felmingham) has been judged by a reviewer in these terms:

“As the backbone for a good course in money and banking ... this book is a gem”

Research reputation - papers

Pedro Schwartz (Director of the Center for Political Economy and Regulation and member of the Royal Academy of Moral and Political Sciences of Spain) has recently 'warmly recommended' Coleman's 'What Was New about Neoliberalism?', *Economic Affairs*, **33**(1), 78-92 (<http://www.econlib.org/library/Columns/y2013/Schwartzneoliberalism.html>)

Tim Leonard (Princeton University) has described Coleman's contribution[§] to *Darwinism and Evolutionary Economics*, (Edward Elgar 2001) as the "standout" paper in the collection (*History of Political Economy*, (2003, **34**(4): pp 350-53.).

P.A. Samuelson (MIT) mentions that one of Coleman's papers** "by the usual Mertonian coincidences ... nicely demonstrates" a point that a simultaneously published paper of Samuelson was making (P.A. Samuelson: "Conversations with my History of Economics Critics", p.13, *Economics, Culture and Education: Essays in Honour of Mark Blaug*, Edward Elgar, 1991).
